

Slide 1: Hospital Management System

Project Overview, MCA Project Presentation

Slide 2: Introduction

Digital hospital management for OPD, IPD, Billing, EMR and Reports

Slide 3: Project Objectives

Automation, accuracy, patient care, reporting and security

Slide 4: Technology Stack

Node.js, Vue.js, Nuxt UI, MySQL, Tailwind CSS, REST APIs

Slide 5: System Architecture

Frontend + Backend + Database Architecture

Slide 6: Major Modules

Registration, OPD, IPD, Billing, Ward, EMR, Insurance

Slide 7: Patient Registration Flow

Login → Registration → UHID → OPD/IPD → Billing

Slide 8: ER Diagram

Patient, Visit, Billing, Payment, Ward and Consultant Relations

Slide 9: OPD Management

Queue, Consultant Assignment, Token and Visit Tracking

Slide 10: IPD Management

Admission, Bed Allocation, Ward Management, Discharge

Slide 11: Billing & Payment

Service Charges, Discounts, Payments and Receipts

Slide 12: EMR & Insurance

Medical Records, TPA and Insurance Management

Slide 13: MIS Reports

OPD Register, IPD Register, Collection Register, Billing Reports

Slide 14: Input Output Screens

Dashboard, Registration, Queue, Payment Screens

Slide 15: Testing

Unit Testing, Integration Testing and System Testing

Slide 16: Limitations

No Mobile App, Limited Integrations, Internet Dependency

Slide 17: Future Scope

AI Features, Telemedicine, Pharmacy, Mobile App

Slide 18: Conclusion

Improves hospital efficiency, reporting and patient management
